🧪 Projects

Phone-book App

> A phone-book app utilizing MERN stack. Built all by myself from the bottom up. This application is also hosted on Heroku found at the website here: https://infinite-bayou-48887.herokuapp.com/. I also used tailwind CSS for a simple and minimalist design.

Expense Tracker App

> Utilizing the React and Bootstrap framework, I created a dummy expense tracker that can filter throughout the years and keep track of expenses. New expenses can be added as well and filtered.

Weather App

> A weather application that pulls from the OpenWeatherMap API and tells the weather for the location inputted. Made with React and bootstrap CSS framework

Calculator

> One of my first projects, wherein I created a fully functioning calculator using only vanilla Javascript, CSS, and HTML

⚙ Skills

Languages/Frameworks React, Node.js, Bootstrap, HTML, CSS, Javascript, Express

Other Skills Information Technology, Networks, IP Subnetting, Fluent in Spanish, Gold in League of Legends
